

Internet Video Phone/Conference Solution

# WebPhone / NetOffice

## WebPhone

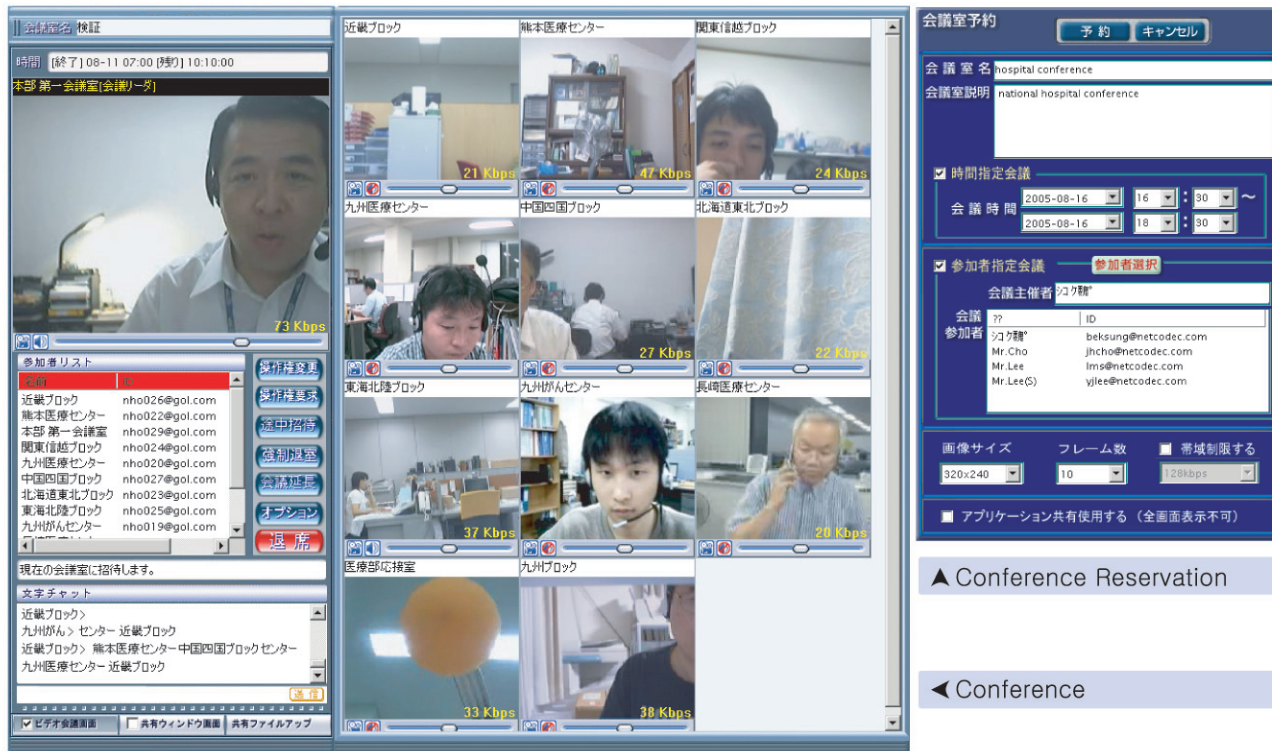

WebPhone is the Internet Video Phone Solution. Just type the http address on your Web Browser, then you can have a meeting with your friend automatically. Webphone supports full screen option for the remote video and document sharing during the call. Call-Center version Webphone supports Call-Transfer and Single Line Extension functions as PBX system.

## NetOffice

NetOffice is the Internet Video Conference Solution.

NetOffice supports the conference reservation function so that you can assign conference participants and time for your conference. NetOffice also supports the mail notification function for the reserved conference and conference participants can join the conference by clicking the http address from their received mail.
