

SoftBank X02HT Usage Notes

Read these notes and User Guide before using SoftBank X02HT.

● Services

X02HT is not compatible with Yahoo! Keitai or some other standard SoftBank Mobile services (S! Cast, S! GPS NAVI, etc.). See <http://mb.softbank.jp/mb/en/> for more information.

● Operation Descriptions & Restrictions

- X02HT cannot be used as a modem.
- To confirm handset phone number, see "My Phone Number" (p.2-2).
- Change Voice Mail number from Call Forwarding; see "Setting Call Forwarding" (p.4-3) and "Setting Voice Mail" (p.4-4).
- When using Internet Explorer Mobile with WLAN On, in-range WLAN connections take priority. To change priority to 3G network connections, cancel WLAN in Comm Manager.
- Exiting Internet Explorer Mobile does not automatically cancel 3G network/WLAN connections. (Connection automatically ends after approximately 30 minutes of inactivity). Use Task Manager to close Internet Explorer Mobile for immediate disconnection. See p.6-12 "Ending Applications."
- If Memory is low, files/mail may not save or be deleted; see "Allocating Free Memory" (p.6-13).
- Mail ringtone plays in full even if mail is opened; use short files like these pre-installed ones:
 - Alert-Ascending Chimes (1 second) Default
 - Alert-Attention (1 second)
 - Alert-Echo (3 seconds)
 - Alert-Exclaim (1 second)
 - Alert-Instant Message (1 second)
 - Alert-Outlook (2 seconds)
 - Alert-Subtle (2 seconds)
- If Manner Mode is activated with Stereo Earphone Microphone connected, ringer does not sound via Stereo Earphone Microphone.
- The following sounds are heard even when Manner Mode is active:
 - Camera shutter click
 - Media Player playback
 - Voice Tag recognition
 - Applications (games, etc.)
- For S! Mail with 28-byte-or-longer Subject (non-UTF-8 character code) and no Text field entry, "This message cannot be displayed" appears in Text field.
- Ringer may not sound or indicator may not appear for incoming Mail in these cases:
 - Multiple messages arriving consecutively
 - Messages arriving just after power on

(Continued on Reverse Side)

- If USIM Card Contacts are set to appear, previously inserted USIM Card Contacts may appear when X02HT is powered on after replacing USIM Card. Select Start → Settings → Phone → Call Options and clear "Show SIM contacts" to hide USIM Card Contacts.
- Appointments and Contacts cannot be saved as vCalendar and vCard files for use on X02HT. Attach vFiles to S! Mail.
- Even if Memory Card is inserted, indicator does not appear in Home; confirm via File Explorer.

● More Important Information

- X02HT preinstalled Operating System and applications are not supported by SoftBank Mobile.
- Windows Update is provided by Microsoft. For details (in Japanese only), see <http://www.microsoft.com/japan/windowsmobile/wmupdate/default.mspx>.
- Repairs re-initialize X02HT. Back up important data before requesting repairs.
- Handset files may be altered or lost due to malfunction, repairs, etc. Back up such information; synchronize handset and PC. For more, see User Guide p.11-1 "Synchronization (ActiveSync)."
- Handset disassembly or sticker removal may void warranty; repair requests may be denied.
- MAC address may be changed by malfunction or repairs.
- If X02HT performance is unstable, back up data and initialize handset.
- X Series handsets or applications installed on X Series handsets may automatically establish an Internet connection via the Network; Network may establish connection with X Series handsets. See <http://mb.softbank.jp/mb/information/details/070907b.html> for details (in Japanese only).
- Even during WLAN connections, some applications may establish 3G Network packet communications connections.
- See online user manual or <http://mb.softbank.jp/mb/en/> for the latest information.
