

Windows® Update for Windows Mobile

Get fixes for critical Windows Mobile 6 security problems. Checking for/downloading updates via SoftBank Network incurs packet communications charges. Connect X02HT to a PC via USB or WLAN, etc. to use Windows Update.

Using SoftBank packet communications incurs fees. Check for/download Windows Updates on a PC via WLAN or USB to avoid incurring packet communication fees.

After each update handset reboots and connects to the server to confirm update results. Regardless of setting in "Use my data plan to check for and download updates." packet transmissions may occur. Keep handset connected to PC via WLAN or USB after update completes and handset reboots for confirmation.

Cancel **Phone** in **Comm Manager** to disable packet transfers.

Use AC Charger for Windows Update. To use Windows Update via packet communication make sure signal conditions are stable.

Connect USB Charger. Access Windows Update via SoftBank Network in strong signal conditions. Back up applications, etc. beforehand. Microsoft and HTC support Windows Update. For details, contact SoftBank Technical Support Center.
